

PUBLIC TRANSPARENCY REPORT

2023

Ui Investissement

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

SENIOR LEADERSHIP STATEMENT

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Our conviction is that the performance of a company depends on two complementary and inseparable trajectories: First, the environmental, social and societal one and in addition, the economic and financial one. To be economically efficient, a company must give meaning to its action, make it sustainable and engage in development that benefits as many people as possible. Engaged alongside leaders, we want to improve the future of our local and national ecosystem. OUR MISSION: "To bring out and develop economically and sustainably efficient companies, by supporting them in a responsible process". Thus, UI Investissement has included in its baseline its desire to combine the economic and CSR dimensions "Together investing and committed for a better future" This desire is historic for UI which was among the first French management company of being PRI signatory in 2010, UI is also member of initiative climat international (formaly IC20), in order to help reducing the greenhouse gas emissions of the companies we hold en ensuring the sustainability of their performance.

This approach is in line with the recommendations of the TCFD (Task Force on Climate-related Financial Disclosure) and the requirements of article 173 of the French Law on Energy Transition for Green Growth in terms of taking climate risks into account and transparency.

Furthermore, this desire is reflected in the day-to-day operational implementation. UI Investissement has defined a proprietary "CSR Trajectory" methodology defined with a major player of ESG advisory (Ethifinance) which bring the guarantee of an objective and independent rating.

"CSR trajectory" is a tool that allows us:

- (1) to diagnose the CSR level of maturity of the company pre-invested thanks to due diligence
- (2) to define an operational action plan to put the company on a trajectory of major progress by focusing on the key strenghts and the weaknesses

- and (3) to measure the CSR performance of each investment each year and upon exit.”

“CSR trajectory ” is a tool based on 4 axes (Environment, Social, Governance and external stakeholder) with 27 indicators analysed to determine the position of each company with regard to its environment (other UI investments classified by sectors) and ultimately to measure UI portfolio global performance.

UI's organization answer to this desire, in addition to the agreement with Ethifinance, UI created a post of CSR Director fully dedicated and expert of ESG.

He's in charge of the deployment of the CSR strategy in relation with investments teams. In addition of his 10 years' experience in private equity, UI gave him the opportunity to develop his academic knowledge by following a 18 month training with a MSc degree in Sustainable Development and Global Management (at MINES ParisTech) he just graduated.

With this taylormade methodology, UI has developed a very efficient and precised tool to measure and improve CSR performance and has guaranteed the integration of extra-financiary criteria for all the companies and at every steps of the investment period.

One step further in 2022, this methodology has been labelled by Bureau Veritas in order to strengthen its objectivity, systematization and compliance with its implementation.

UI Investissement was audited (on a voluntary basis) and then certified on compliance with its extra-financial commitments.

Following the obtention of the label, several LP's but also other management companies have indicated their desire to use CSR Trajectory. The objective of this tool being to support as many SMEs as possible, so, of course, we accepted that. In order to make this use possible by multiple actors, we have decided to digitize the tool. This first step is now complete.

We are now launching the second, which consists of integrating training content, awareness-raising videos, templates, etc. on the site, all to best support management teams in improving extra-financial performance in an operational way.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

Our main improvement of 2022 were :

- Obtaining Labelisation of CSR Trajectory. This labelisation allow wus to go step further. As explain upper, we digitalized the tool to make it available to as many SME's as possible.

- Raising an Impact fund classified Article 9 to invest in SMEs whose objective is to invest in companies whose business model is to respond to environmental or social issues

- Training all the team on CSR subject

- Reworking our ESG Trajectory methodology; which was originally oriented towards growth capital companies; in order to adapt it to the specific problems of investment in innovation

- Organizing specific ESG events : masterclass dedicated to the GHG reduction, fresque du numérique...

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

Next steps in the development of Trajectoire ESG are the integration of a training module and an awareness tool into the platform.

We will also make best practices available so that every SME can benefit from them.

UI Investissement also wishes to make this platform available to all of our stakeholders. Several of our Lp's have already specified to us marks of interest for the use of the platform.

Has your organisation identified climate-related risks and opportunities affecting your investments?

(A) Yes, within our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

We have identified climate risks in several of our investments. For example, we have an almond distribution company in France. These almonds are mainly from the US market and in particular Californian. As this market is strongly impacted by climate change, we are working to move towards sustainable and more local agriculture. Part of the supply is now European and investments have been made in sustainable cultivation with, for example, the almond company in France.

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

(A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

At UI Investissement, we are perfectly aware of the long-term and even medium-term impact of climate risks. As a management company, we have of course carried out a carbon assessment in order to identify our main sources of emissions and of course implemented a program to reduce these emissions, including a low-carbon transport policy, and rational management of computer equipment. The main impact of course remains on our portfolio and this involves in particular numerous training courses for our investment teams but also awareness raising for the boards of our joint venture companies. For example, we organized two masterclasses on the carbon footprint where we were able to bring together many business leaders / or people in charge of ESG in our investments. We have also organized several frescoes (climate / digital) in order to once again sensitize the management teams of our investments.

Describe up to two processes you have put in place during the reporting year to help meet your targets on material ESG factors.

(A) Process one

As explained before, to help the companies in our portfolio integrate sustainable development issues, we set up, in 2019, our program Trajectoire ESG, which is a tool for improving extra-financial performance and which supports the implementation establishment of a CSR strategy and its operational implementation taking into account their issues and their size. "Trajectoire ESG" is also a rating tool that allows the analysis of results in a long-term progression approach.

Trajectoire ESG is a unique, proprietary and innovative program for improving CSR performance. Resulting from 2 years of academic research at Mines ParisTech and the work of independent CSR experts, this program is divided into 3 stages:

First : Initial measurement of the company's ESG maturity with the identification of strong points and areas for improvement to be addressed as a priority.

Second : Definition of a CSR strategy with company management, the investment team and UI CSR experts.

Finally : Annual measurement and final evaluation of progress with an analysis of overall individual performance with regard to companies supported by UI using a progress benchmark.

Thus, through ESG Trajectory, extra-financial criteria are integrated into all stages of the investment.

Every year; Bureau Veritas audit UI Investissement in order to ensure that Trajectoire ESG has been performed on all investment and if the requirements are respected.

Describe how you ensure that material ESG risks are adequately addressed in the private equity investments in which you hold a minority stake.

In the context of a minority investment, we approach our co-investor to set up an ESG committee to support the portfolio company on ESG issues. We also propose using ESG Trajectory as a “lead” tool for monitoring ESG performance.
